PROJECTS

AI-Powered Social Media Trend Tracker — “TrendPulse”

Feb 2026 – May 2026

Tech Stack: React Native CLI, TypeScript, Node.js, Express.js, MongoDB, Gemini API

- Built a cross-platform mobile app for real-time social media trend analysis, from UI to backend APIs.
- Integrated the Gemini API for AI-based categorization, auto-summaries, and trend prediction.
- Designed and consumed REST APIs connecting the React Native frontend to an Express.js/MongoDB backend.
- Tested and optimized app performance on physical Android devices for real-world reliability.

Travel & Tour Management System

Jun 2025 – Aug 2025

Tech Stack: PHP, MySQL, Bootstrap, HTML5, CSS3, JavaScript

- Built a responsive travel booking platform with tour browsing, wishlist, and booking-tracking features.
- Implemented secure authentication and session-based user management from scratch.
- Designed a responsive, mobile-friendly UI ensuring smooth navigation across devices.

Personal Portfolio Website

Live Deployed Project

Tech Stack: Next.js 15, TypeScript, Tailwind CSS, Framer Motion, HTML5 Canvas API, Vercel

- Developed and deployed a premium, responsive portfolio with glassmorphism UI and custom animations.
- Optimized performance (assets, rendering) and shipped via CI to Vercel.
